

Burl Desk and Chair

Featured Piece of the Month – June 2021

Steve McKenna

I showed these two newly finished pieces to the FIG group [back in March, 2021] and thought someone else might like to see them. The desk is red and white oak, the top is one 6/4 board that waterfalls over the end through the dovetails into a carved leg. The cabinet I made in 2014 and was inspired by the massive red oak burl that I found in the Great Meadow behind my house and is supported by a live edge red oak leg.

The chair is walnut, based on George Nakashima's conoid chair, cantilevered leg design. I'll be putting up more pictures on my website: stevemckennawoodworking.com
